Right to work in the UK: Full work rights – no visa sponsorship required.

PROFESSIONAL SUMMARY

Full-Stack JavaScript Developer with 3 years of commercial experience building secure, high-performance web and mobile applications across fintech, e-commerce and startup companies. Strong specialism in the React ecosystem (React.js, Next.js, React Native, TypeScript) backed by solid Node.js / Express backend skills. Track record of shipping production banking features, leading a startup web product end-to-end, and improving application performance. Now based in Birmingham with full right to work in the UK, looking to bring this experience to a UK product or fintech team.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript

Frontend & Mobile: React.js, Next.js, React Native (Expo & CLI), HTML5, CSS3

Backend & APIs: Node.js, Express.js, RESTful APIs, MongoDB

State & Data: Redux, Redux-Saga, React Query, MobX

Styling & UI: Tailwind CSS, Bootstrap

Architecture: OOP, Design Patterns (Singleton, Factory, Observer, Middleware), JSI architecture, Server-Side Rendering (SSR)

Tools & Practices: Git, Webpack, Babel, Figma, Swagger, Agile / Scrum, SEO optimization

PROFESSIONAL EXPERIENCE

Full-Stack & Mobile Developer (React Native / Node.js)

Tosan — Banking & Payment Solutions Provider

10/2024 – Present

- Developed and maintained secure mobile banking features in React Native, ensuring high performance and reliability for sensitive financial transactions.
- Architected backend services with Node.js and Express, building RESTful APIs for core banking operations including authentication, account management and transaction processing.
- Propose and migrate to JSI (JavaScript Interface) architecture, removing the traditional React Native bridge and significantly reducing overhead.
- Applied design patterns (Factory, Singleton, Express middleware) so as to force modularity, reusability and clean, consistent code across multiple microservices.

Frontend Developer (Next.js & TypeScript)

A1 Cable — Startup

04/2024 – 10/2024

- Led end-to-end development of a production web application, from initial architecture design through to deployment, using Next.js and TypeScript.
- Engineered the entire frontend independently, building scalable, reusable React components for user dashboards, authentication, products and data-management workflows.
- Improved performance and SEO rankings by implementing Server-Side Rendering (SSR) and advanced Next.js optimization techniques.
- Worked closely with business stakeholders in an Agile environment, translating requirements into technical solutions.

Frontend & Mobile Developer

Fidilio — Food Tech

03/2022 – 03/2024

- Built responsive, accessible interfaces using modern JavaScript (ES6+), React.js and Tailwind CSS.
- Spearheaded the new-generation Fidilio mobile application using React Native (Expo).
- Reduced page load time by 30% and ensured SEO-friendly rendering using Redux / Redux-Saga and Google Lighthouse & Search Console.

- Collaborated cross-functionally with backend developers, UI/UX designers and external partners (e.g. Snapp food company) to deliver clean APIs and resolve performance bottlenecks.

EDUCATION

Bachelor of Science in Computer Engineering

2021 – 2025

PUBLICATIONS & CERTIFICATIONS

- **Technical articles (Medium):** authored guides on [Next.js 14](#) and the [Zig programming language](#).
- **Certifications:** Software Development — [Coursera](#) and Anisa Institute.
